

Kamoliddin Rasulov

PROFILE

IELTS 6.5 | Available full-time, in-person |

Self-taught developer focused on building real products, not tutorial projects. Built and deployed full-stack applications using Python, Flask, JavaScript, React Native, PostgreSQL, and Ubuntu servers mostly using AI and vibe coding. Comfortable working in English-speaking environments, collaborating remotely and in office, debugging production issues, and learning fast under pressure. Currently improving frontend engineering skills while continuing backend and product development work.

PERSONAL PROJECTS

Marketplace Mobile App (Karrot - inspired local marketplace)

Built a full-stack local marketplace app inspired by Korean community commerce platforms using Django backend and Flutter/Dart mobile frontend.

Implemented authentication flows, product listings, image uploads, chat structure, and regional categorization logic for Uzbek cities and districts.

Focused on practical UI/UX iteration, feature planning, and rapid AI-assisted development workflows.

Energy Audit Platform

Developed a production energy audit platform used by a real client company for generating residential energy audit reports.

Handled backend deployment on Ubuntu servers and integrated automated Word report generation using python-docx.

Transportation Telegram Bot Ecosystem

Designed a multi-role transportation system with separate passenger, driver, and dispatcher Telegram bots connected to one backend.

Implemented live booking flows, session state handling, request filtering, and modular bot architecture in Python.

EXPERIENCE

Silk Road Professionals & Baker Street Network

June 2026 - Present

Contributed to production projects as a junior developer in an internship: built and maintained custom Odoo 19 modules (agriculture management platform), including custom models, and OWL frontend components. Also worked on an EOS business platform (NestJS, Angular, PostgreSQL) — implemented workspace entities, database migrations, Google OAuth, and reviewed teammates' code. Comfortable with Git/ GitHub workflows, REST APIs, and Linux server environments.

Co-Founder & Project Lead SchoolLink

Apr 2022 - 2024

Founded an online platform for English and IT courses; managed scheduling, curriculum, and student-tracking systems.

Directed marketing, partnerships, and day-to-day operations of a live product serving real students.

Project Manager · XCDM.AI

Jun 2023 - Aug 2024

Translated business requirements into developer tasks and managed client communications in English.

Gained hands-on exposure to software delivery, API-driven features, and agile workflows.

LANGUAGES

ENGLISH / Advanced
KOREAN / Intermediate
UZBEK / Native

KEY SKILLS

- Frontend: HTML, CSS, JavaScript, responsive layouts, DOM manipulation, async fetch APIs
- Backend: Python, Flask, REST APIs, server deployment
- Database: PostgreSQL
- Mobile: React Native (Expo), API integration, navigation flows
- Tools: Git, GitHub, VS Code, Postman, Linux terminal, bash scripting
- Other: Vibe coding, Debugging simple issues

EDUCATION

BBA Degree - Sejong university
(AACSB accredited)

2017-2022

Relevant coursework: Python basics, Data Structures and Algorithms, Management Information systems, Software Development, Business intelligence
